

PRIVILEGED AND CONFIDENTIAL

September 8, 1993

Memorandum to: Mr. John F. Anders  
Mr. Scott Appleton  
Dr. Dennis Dietz  
Dr. Alex W. Spears  
Dr. Richard Carchman  
Dr. Robert Suber

Attached are copies of the enclosures to the July 22, 1993 letter from Dr. Dowdle, Acting Director of the CDC, to Representative Wyden. The enclosures include (1) a table (Table 1) of the toxic effects of the 13 ingredients that CDC has identified as included on the 1992 cigarette ingredient list but not included on FDA's current list of approved food ingredients (EAFUS list), (2) a table (Table 2) of the 5 ingredients (of the 13 identified by the CDC) that are regulated as hazardous substances under federal law, (3) NCI reviews (prepared by Technical Resources, Inc. under contract to NCI) of menthol and triethylene glycol, and (4) an August 8, 1990 letter from HHS Secretary Sullivan to Representative Waxman together with a summary table prepared by HHS indicating the regulatory status and possible presence in tobacco products or tobacco smoke of a number of specific substances in which Representative Waxman had indicated an interest. The only enclosures to Dr. Dowdle's July 22, 1993 letter that we have not yet obtained are Representative Waxman's 1990 letter to HHS and the second enclosure to Secretary Sullivan's August 8, 1990 response (identified as "Profiles of Chemical Additives").

Distribution of the enclosed documents should be limited to the extent possible, and their confidentiality should be carefully maintained.
